By Matt Taibbi

In his book *No Island of Sanity: The Corruption of the Conservative Mind*, Matt Taibbi argues that the conservative movement in the United States has become corrupted by the alt-right. He traces the rise of the alt-right to the Tea Party movement and the conservative media echo chamber, and he argues that the alt-right has now become the dominant force within the conservative movement.

Taibbi argues that the alt-right is not simply a collection of racists and bigots, but a sophisticated political movement that has developed its own ideology and media outlets. He argues that the alt-right is a threat to democracy because it promotes violence, racism, and sexism.

Taibbi also argues that the conservative movement has failed to stand up to the alt-right because it has become too dependent on right-wing media outlets for its information. He argues that these media outlets have created an echo chamber in which conservatives are only exposed to information that confirms their existing beliefs.

Taibbi concludes by calling on conservatives to reject the alt-right and to return to the principles of conservatism. He argues that conservatism is a valuable tradition that has a lot to offer the country, but that it has been corrupted by the alt-right.

The Alt-Right

The alt-right is a loosely defined group of far-right ideologies and political movements that originated in the early 2010s. The alt-right is characterized by its white nationalism, anti-semitism, and opposition to immigration.

The alt-right has its roots in the white supremacist movement, but it has also been influenced by other far-right ideologies, such as fascism and nationalism. The alt-right is often associated with the use of online trolling and harassment to promote its views.

The alt-right has become increasingly prominent in recent years, particularly in the wake of the 2016 presidential election. The alt-right has been blamed for a number of violent incidents, including the Charlottesville rally in 2017.

The Conservative Media Echo Chamber

The conservative media echo chamber is a term used to describe the phenomenon in which conservatives are only exposed to information that

confirms their existing beliefs. This is due to the fact that conservatives tend to consume media outlets that are owned and operated by conservative organizations.

The conservative media echo chamber has been created by a number of factors, including the rise of conservative talk radio, the proliferation of conservative websites and blogs, and the decline of mainstream media outlets.

The conservative media echo chamber has had a number of negative consequences for the conservative movement. It has led to a lack of critical thinking, a refusal to consider alternative viewpoints, and a growing sense of paranoia.

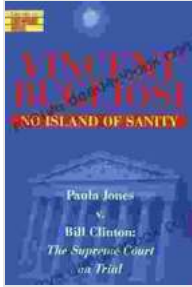

The Corruption of the Conservative Mind

Taibbi argues that the conservative movement has become corrupted by the alt-right and the conservative media echo chamber. He argues that the alt-right has hijacked the conservative movement and that the conservative media echo chamber has created an environment in which conservatives are no longer able to think critically about their own beliefs.

Taibbi concludes by calling on conservatives to reject the alt-right and to return to the principles of conservatism. He argues that conservatism is a valuable tradition that has a lot to offer the country, but that it has been corrupted by the alt-right.
