## Organization

The Stagecraft Handbook is divided into four parts:

1. : This part provides an overview of technical theater and the roles of the various technical theater personnel.
2. Fundamentals of Stagecraft: This part covers the basic principles of stagecraft, including safety, tools, materials, and construction techniques.
3. Technical Theater Systems: This part covers the different technical theater systems, including lighting, sound, scenic design, and costumes.
4. Production Management: This part covers the management of a theatrical production, including budgeting, scheduling, and staffing.

Each part is divided into several chapters, which cover specific topics. For example, the chapter on "Safety" covers general safety guidelines, specific hazards associated with stagecraft, and emergency procedures. The chapter on "Lighting" covers the principles of lighting design, different types of lighting instruments, and lighting control systems.
